

# 371-FLAT

SOLID EXTRUDED  
ALUMINUM AWNING

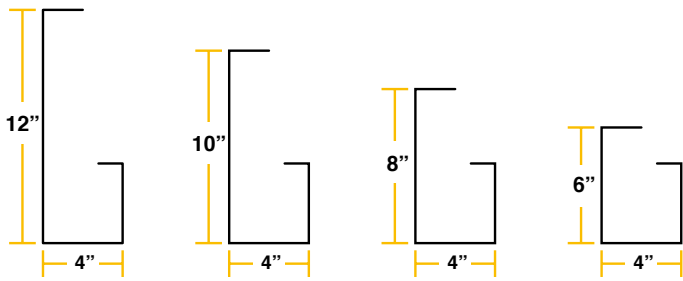

## DESCRIPTION

**371-Flat** is a horizontal sunshade and shelter designed with an internal gutter system that can drain water from the front or back. Its frame is made from a solid aluminum extrusion giving it a slick seamless look, while its support arms are hinged on either end allowing you to decide the angle that best suits your building. This product can be finished with a raw aluminum look or painted to match your brand or design aesthetic.
