

# 373-SUNSHADE

ALUMINUM AWNING WITH  
SLATED SUNSHADE

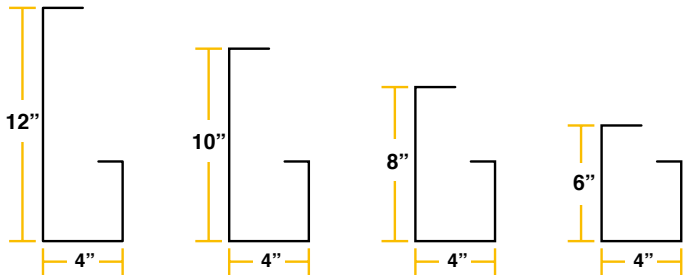

SOLID METAL

## DESCRIPTION

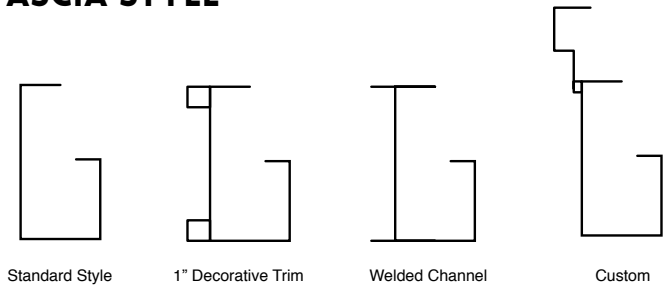

**373-Sunshade**, starts with a solid aluminum extrusion for a clean sleek look. In favor of a solid covering, this sunshade awning has slated ribs giving a transitional blend of sunlight and shade. This awning is mounted perpendicularly to the exterior wall with heavy load anchors to prevent sagging without the need for additional support bars.
